

Claiming for Assistive Devices

Under the School-Based ACCESS Program (SBAP), participating LEA's are eligible to claim Medical Assistance (MA) reimbursement for procurement and repairs of student-specific assistive technology devices, provided the following criteria are met and/or forms are completed:

1. Student has been identified as receiving special education services.

The student must have a current Individual Education Program (IEP) that defines the student's need for the device and any needed related supportive services. The student's IEP team must have determined that an assistive device and/or service are necessary for the student to benefit from his/her education program.

2. Student is between 3-20 years old.

3. Student is enrolled in the Medical Assistance (MA) program.

The student must be actively enrolled in the MA program and eligible to receive MA benefits.

4. The assistive device needed by the student is identified under SBAP guidelines as eligible for reimbursement.

Only certain assistive devices qualify for reimbursement. Under SBAP, an assistive device is defined as an item, piece of equipment, or product system that is used to increase, maintain or improve the functional capabilities of the student with a disability. For list of devices that qualify for reimbursement, refer to the *Assistive Device List* in this packet.

5. Parental consent has been obtained.

Per the Individuals with Disabilities Education Act (IDEA) and the Family Educational Rights and Privacy Act (FERPA), the student's parent must sign a *Parental Consent Form*, authorizing the LEA to claim MA reimbursement for the assistive device.

Note: If the parent has already signed a *Parental Consent Form* authorizing the LEA to claim for MA reimbursement for the current prescribing IEP an additional form is not required for the assistive device.

6. Medical authorization has been obtained.

The assistive device must be deemed medically necessary and be ordered on either:

- a. physician's prescription
- b. *Medical Practitioner Authorization Form*

If using the *Medical Practitioner Authorization Form*, the appropriate assistive device category must be checked and the form must be signed and dated by one of the following practitioners:

- Medical Doctor (MD)
- Doctor of Osteopathy (DO)

7. Transfer of ownership letter/notice has been signed and received from parent.

If the LEA is submitting an eligible assistive device for SBAP reimbursement, the ownership of the device must be transferred to student. The LEA must send a *Transfer of Ownership* letter to notify the parent of a possible transfer.

8. Assistive Device Billing Form has been completed and submitted to PCG.

The LEA must complete an *Assistive Device Billing Form* and submit it to PCG.

- **You must also include a copy of the device invoice and a copy of the Transfer of Ownership Letter.** If claiming reimbursement for a device repair, include a copy of the repair invoice as proof of payment.

9. Billing Rejection Notice is sent to the parent (only if claim is rejected).

In the event that MA rejects as assistive device claim, PCG will notify the LEA. The LEA will notify the parent via a *Billing Rejection Notice* that the device will remain the property of the LEA.

**10. The LEA will make copies of all paper documentation as needed to submit a claim;
LEA will maintain all original documents submitted to SBAP as part of the claim.
LEA will maintain these documents for six years for audit purposes.**

11. Assistive Device documentation can be sent to PCG through the following Methods:

Email (PREFERRED METHOD):

SBAPsupport@pcgus.com

Please place "Assistive Device" in the subject.

Assistive Device Parental Consent Form

Local Education Agencies (LEAs) are eligible to receive federal Medicaid reimbursement for student-specific assistive technology devices and its repairs when the device meets the requirements of the state's Medicaid program and is necessary for the student to benefit from his or her education program.

The Individual with Disabilities Education Improvement Act of 2004 (IDEA) and the Family Educational Rights and Privacy Act (FERPA) require schools to obtain written parental consent to share students' education and health-related records such as IEPs and Evaluation Reports. We are requesting your permission to share this information with the PA Department of Education, the PA Department of Public Welfare, and a physician in order to bill Medical Assistance.

In addition to the Medicaid-covered services your child may receive as part of his/her IEP, MA will continue to pay for medically necessary, Medicaid-covered services that are provided to your child outside of school.

I understand that:

- if I give permission, I may withdraw it for future services at any time. However, it does not negate an action that has occurred after consent was given and before the consent was revoked.
- my refusal to give consent will not change the services my child received under his/her IEP.
- whether I consent or refuse, I will not have to pay for these services.
- upon request, I may receive copies of my child's records that are disclosed as a result of this authorization.

I **give** my child's school permission to share my child's education and health-related information and bill Medical Assistance.

I **do not give** my child's school permission to share my child's educational and health-related information and bill Medical Assistance.

Assistive Device Transfer of Ownership

Student's Name: _____

Transfer of Ownership Date: _____

Dear Parent/Guardian:

Your child's LEA (Local Education Agency) is a participant of the School Based ACCESS Program (SBAP). Through SBAP, they can submit a claim for reimbursement from Medical Assistance (MA) for the cost of providing your child with this assistive device.

A claim for this device, which was purchased specifically for your child, is being processed. Once MA approves and reimburses the LEA for the federal portion of the cost, the ownership of this device must transfer to your child.

Please note that if MA rejects the claim, your child will continue to have full access to this device as part of his/her Individual Education Program (IEP); however, the device will remain the property of the LEA.

The LEA, through the Assistive Technology Team, will provide the necessary training and support in the use of the device. It is important to collaborate with the school personnel who are assisting in the training process for the proper use of the device.

If the device is not working and needs to be repaired, please contact us at _____ for assistance. The LEA is responsible for any costs related to the repair of the device; however, the school district does not cover any repairs once the student graduates.

If you have any questions, please contact your LEA for assistance.

Sincerely,

cc: School District Representative

Solutions that Matter

Assistive Device Billing Rejection Notice

Date: _____

Dear Parent:

This letter is to inform you that Medical Assistance has denied our Local Education Agency's (LEA) claim for cost reimbursement for your child's assistive device.

Therefore, the device will remain the property of our LEA. However, your child will continue to have full access to the device as part of his/her Individual Education Program (IEP) until your child graduates.

If the device should malfunction and need repair, please call

_____ at _____ for assistance. The LEA is responsible for any costs related to the repair of the device.

Please do not hesitate to contact me if you have questions.

Sincerely,

cc:
